PRELIMINARY AMENDMENT

In the Claims

[Cancel claims 1-27.]

[Please amend claims 28, 29 and 30 as follows:]

28. (Amended) An antibody capable of selectively binding to a modified chemokine [according to claim 1] characterized by the truncation of from 2 to 8 amino acids from the amino terminus of the corresponding mature chemokine wherein the mature chemokine is wherein the mature chemokine is selected from the group consisting of KC, gro- β , gro- γ , and gro- α , consisting of the amino acid sequence shown in SEQ ID NO: 1, respectively; and wherein the modified chemokine has at least a log higher biological activity than the corresponding mature chemokine.
